LOGISTICS INTELLIGENCE

DIGITAL SOLUTIONS

LOGISTICS INTELLIGENCE

TAKE SPREADSHEETS OUT OF DAILY SCHEDULING.

Schedule with confidence, without the spreadsheets. We have built a C/ETRM platform-agnostic commercial scheduling solution that manages nominations, monitors physical inventory, and keeps the in-month forecast current every time a nomination moves. No exports. No rebuilds.

THE CAPSPIRE SOLUTION – ALL INSIDE YOUR C/ETRM ECOSYSTEM

capSpire's Logistics Intelligence connects directly to your C/ETRM platform APIs, automating daily nomination entry and tracking and carrying that live data through to in month forecasting. No middleware, no extra license, nothing an upgrade can undo.

Predictive logic reconciles business rules, nominations against C/ETRM positions continuously, flagging exceptions while they are easier to fix.

Compatibility is our responsibility. C/ETRM upgrades and support are our core business, so the solution moves with the platform.

THE TRADES LIVE IN YOUR C/ETRM PLATFORM. THE NOMINATIONS LIVE IN EXCEL.

C/ETRM platforms were not designed to manage nominations well, hence most teams run them in spreadsheets alongside. Forecasting is the same. The platform holds the trade and position data, but a live in-month view means exporting to Excel and rebuilding it by hand every time a nomination changes.

For the business, that means two sources of truth and decisions made on numbers hours behind the market, paid for in missed nominations, demurrage and working capital held against uncertainty.

For IT, it is a control problem as much as an efficiency one. A business-critical process runs in an unmanaged file, outside change control, outside the audit trail, dependent on whoever built the workbook.

BUSINESS BENEFITS, BY ROLE.

SCHEDULERS

Matching and reporting both come from the system. The spreadsheet goes away.

- Hours back every day, spent on exceptions instead of data entry.
- Bulk entry that keeps pace with high-volume activity without adding staff.
- Daily reports from live data, not from a workbook someone updates first.

INVENTORY MANAGERS

Nominated against actual volumes, reconciled and reported without a rebuild.

- Less safety stock held against uncertainty, freeing the cash it ties up.
- Contract-aware data that improves linefill and tank management, cutting the shortages and overstock that eat into margin.
- One set of volumes on demand, so everyone reads the same numbers.

LOGISTICS MANAGERS

Forecasts that move with live trade data.

- Fewer demurrage and cargo timing penalties from out-of-date plans.
- Cut-off times and volume tolerances held in the system, not in someone's memory.
- Revisions in minutes, not a full rebuild.

IT AND PLATFORM OWNERS

New capability on the platform you already support. No new system.

- No middleware, no separate license, no new vendor to approve and secure.
- Tested against each C/ETRM platform release by the same team that handles your upgrades.
- A business-critical process moves into change control, with an audit trail behind every committed volume.

BOOK A DEMO

Thirty minutes with capSpire, in a live C/ETRM environment. See the nomination workflow run end to end, then put your own numbers against it: demurrage avoided, cash released, hours back to your team.

ABOUT CAPSPIRE

capSpire is a global technology consulting firm empowering energy, commodities, and capital markets organizations to achieve measurable outcomes from their trading, risk, and treasury management platforms. Through Advisory, Delivery, and Operations & Support, we help clients strengthen trading and risk capabilities, modernize treasury operations, and accelerate digital transformation.
